About Us

Rupert Construction Services Inc, a Service-Disabled Veteran-Owned Small Business (SDVOSB), specializes in Construction Management for the private sector with experience managing small, large, and complex projects, internationally. From scoping through to completion, we provide services for Homeowners Associations (HOAs) for rehabilitation, restoration, modification, and improvement projects.

With over 25 years of experience leading international and national projects, we are resourced with highly-skilled professionals and management templates, processes, and procedures that result in effective project delivery. We support HOA owners, tenants, and boards, as well as design teams and general contractors with the planning and developing and through the construction of their projects. We work to support HOAs and manage all stakeholders to find solutions that work for everyone and result in projects being delivered on budget and on time while mitigating risk.

The success of our business is the direct result of our long-standing client relationships and our strong operating principles:

- **dedication** to the process of delivering projects professionally with our clients' interests at heart;
- ensuring our team is **reliable**, working with our customers and with partner service providers; and
- always acting with **integrity** in a collaborative process.

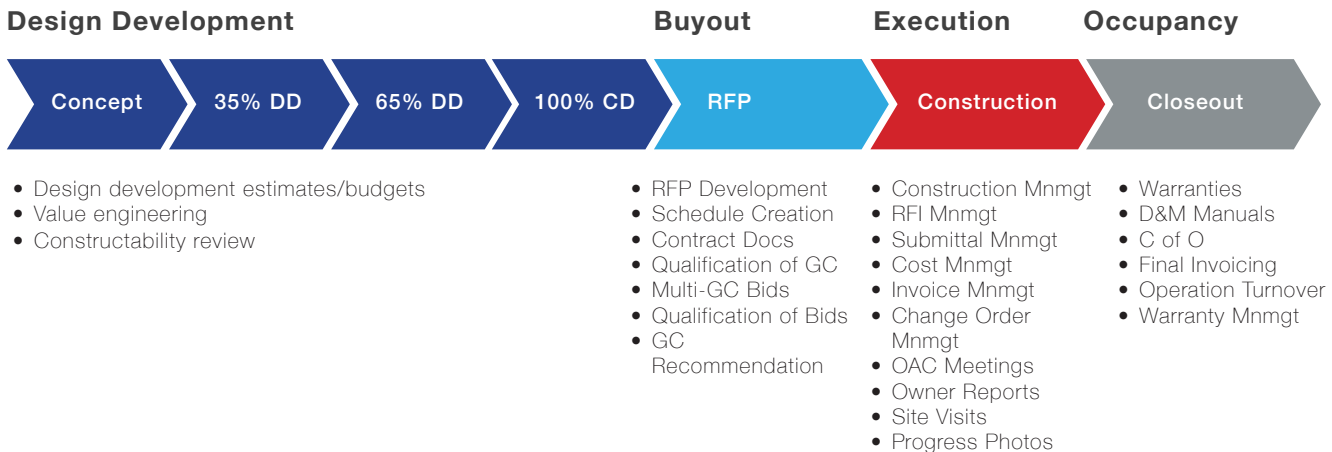

Our Services

Our construction management service offering includes all aspects of a project, from planning through to completion, closeout, and handover. We work with general contractors (GCs), architects, owners or tenants, and HOA boards to find solutions to cost-related and schedule issues that maintain quality while driving value and efficiencies. All of our services are tailored to each individual client and their specific challenges and building while underlined by principles and experience gained from years of working in the industry.

For HOAs we strive to work with all stakeholders to assess the unique variables from the start, allowing better control during construction and favorable outcomes for all parties. Our team understands how to implement proven construction management fundamentals to deliver projects that surpass client expectations.
